EVOLVE P10/P20

The next level in product protection

- Attractive, modern design that is easily integrated into existing shop layouts
- Perfectly suited for use in the most varied environments, from downtown shopping areas and individual retail outlets, to the most challenging settings such as shopping centers, malls, supermarkets, DIY stores and garden centers
- Brushed metal side panels increase durability and add to antenna aesthetics
- Choose from various design options for frame and cover colors
- Modular upgrades enable integration of visitor counting and Smart Alarm Management (SAM)
- EVOLVE antennas are compatible with all Checkpoint EAS solutions and RF labels

EVOLVE Beyond Imagination

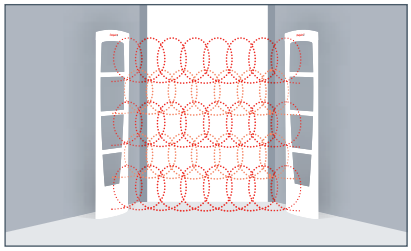

Checkpoint®

EVOLVE P10/P20

KEY TECHNOLOGIES FOR A SURPRISING RANGE OF POSSIBILITIES

Outstanding System Performance

Thanks to revolutionary 360 RF technology, EVOLVE offers the best detection performance available. The new rotating RF field improves accuracy by relying less on tag orientation, while enabling wider aisles to provide a superior shopping experience for consumers.

360 RF: A new technology that improves detection levels

Full System Connectivity

With EVOLVE all products work on the same platform; antennas and deactivators share one electronic design. TCP/IP addressable devices, Ethernet communication, and FTP server capabilities streamline processes and ensure that existing retail IT systems and the EVOLVE platform communicate smoothly and securely.

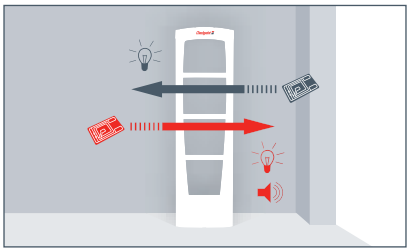

Improved Investment Protection

EVOLVE is a platform for expansion. It enables improvements to the function/performance of the current system, or the addition of new functions, through a combination of hardware and firmware upgrades.

Enhanced System Integrity

EVOLVE offers a unique level of system integrity. By improving detection rates, improving system integrity and integrating loss prevention analytics with other essential in-store information, EVOLVE gives retail store employees greater confidence in the system's accuracy and responsiveness, so they can focus on what's important: helping customers.

SAM: Clear distinction between tags entering and exiting a store

Intelligent Deactivation

Intelligent Deactivation transforms EVOLVE from a loss prevention system into a powerful sales analysis and shrink management solution. It is equipped with a smart learning feature that automatically creates a log of scanned and deactivated items, and tracks deviations that may indicate theft.

ACCESSORIES

A wide range of accessories, such as advertising panels, safety panels, bumper posts with deflectors, external shields and modular visitor counting (VisiPlus™), are available for use with the EVOLVE P antennas.

Modular visitor counting (VisiPlus™)

Bumper posts | Customizable ad panels

Technical Data:	EVOLVE P10	EVOLVE P20
Width:	19.68 inches	12 inches
Depth:	4.55 inches	4.57 inches
Height:	67.28 inches	67.4 inches
Weight:	26.5 lbs.	22 lbs.
Material:	Satin/Stainless Steel	Satin/Stainless Steel
Color:	RAL 7030/RAL 9002	RAL 7030/RAL 9002
Max. voltage:	24 V	24 V
