MYRING
GIULINI's glamorous Collection

MyRing is the proposal presented by **GIULINI G**. on the occasion of the Cersaie Exhibition in Bologna. A collection designed by **Gianluca Paludi** which combines style and elegance with technology and quality, in a glamorous interpretation of today's market.
A unique and distinctive mark made of simple lines and pure volumes which gives an exclusive touch to the bathroom. The colour turns out to be essential for the personalization and creation of new solutions, also for the dynamic and constantly evolving contract sector. The minimal black-chrome and chrome-white proposals are shown for the first time at the Cersaie Exhibition.
The Collection is converted into its 3-holes and single-hole versions, in this last case with the distinctive trait of a reclinable spout.

MyRing, a collection to give a glamorous touch to the bathroom.
